

Resources

PARCC is committed to providing guidance and support to member states as they implement the Common Core State Standards. To support parents and educators in their efforts to provide their children and students with a quality education, PARCC is developing a number of tools ([link](#)) and resources ([link](#)) aligned with the Common Core standards and the PARCC assessments.

Eventually, these resources will be available on the Partnership Resource Center (PRC), a dynamic and interactive web-based library of all PARCC resources and materials. The PRC will be available in 2014.

Educators

The new assessments will provide teachers with timely, actionable information about how their students are progressing in class. See [resources available to educators](#) ^[1].

Parents

The new assessments will provide parents with better and more timely information about how their child is progressing in school. See [resources available to parents](#) ^[2].

Common Core State Standards

To ensure all students are prepared for success after graduation, the Common Core State Standards establish a set of clear, consistent guidelines for what students should know and be able to do at each grade level in math and English Language Arts.

We Want to Hear from You

PARCC wants to hear from you. If you are interested in providing feedback on any of these

tools as they are developed, please fill out this survey (link). The more feedback PARCC gets from you, the more useful the tools will be. PARCC would also like to hear your experiences with implementing the Common Core State Standards in your classroom. In addition to filling out the survey, you can always [contact us](#) ^[4].
